## EXPERIENCE

### Outlier AI – Quantitative Analyst (Remote)

Jun 2024 – Present

- Ranks in top 0.1% of company performers for model debugging and solutions architecture
- Architect 120+ GenAI / LLM solutions for enterprise leaders (Google, Meta, OpenAI, Anthropic, etc.)
- Translate business and technical requirements and analyze model performance: 40% time-to-solution reduction
- Support AI strategy by diagnosing 250+ model reasoning errors in GenAI / LLM technologies
- Generate 300+ insights from AI/ML model debugging to inform and shape the platform feature roadmap
- Collaborate with leadership to align technology investments with long-term organizational goals for 5 projects
- Bridge communication between 4+ technical and non-technical stakeholders and executive audiences

### Morgan Stanley, Manhattan NY – Technical Business Analyst

Sept 2022 – Jun 2024

- Modeled 20+ years of historical behavioral data to connect leading drivers to forward outcomes, testing hypotheses through scenario analysis to inform strategic investment decisions
- Drove 5+ business cases and financial models to assess the value, cost, and ROI of technology initiatives
- Quantified strategic impact by evaluating scenarios identifying 15% increase in Net New Acquired Assets
- Partnered with COO to secure stakeholder buy-in, driving 60% usage increase and \$500K+ in cost savings
- Analyzed sourcing approaches and tech operating models, unlocking \$8M in revenue and removing \$2M in cost
- Developed platform or product strategies for go-to-market campaigns driving 10% retention increase
- Developed 5+ future-state visions and formal proposals for new technology operations
- Supported delivery of 10+ technology transformation roadmaps and IT modernization plans
- Acted as solutions architect translating business and technical requirements into 7+ early-stage prototypes
- Designed and optimized 5+ trillion row dataset infrastructure and systems architecture on Azure cloud platforms
- Led IT modernization by replacing workflows with SQL, reducing data reconciliation downtime by 3000%
- Conducted assessments and built governance frameworks and target operating models for data architecture: 99.5% confidence
- Ensured resilient operations by identifying operational risk in 15+ no-code data-workflows
- Managed technology risk and cybersecurity protocols related to PII access control and data privacy for over 300K clients
- Improved data quality 10% and ensured compliance with 100% audit-ready data lineage
- Managed DevOps CI/CD pipelines to test, validate, and deploy 25+ improved workflows and applications
- Accelerated execution plans for reporting workflows improving cycle speed by 300%
- Led internal IP development and thought leadership by creating reusable models adopted by 3+ teams
- Prepared 100+ client-ready materials (decks, diagnostics, and strategic artifacts) using PowerPoint
- Presented 100+ business narratives and insights to executive audiences (COO) to drive consensus
- Thrived in ambiguity solving 5+ complex problems daily in fast-moving environments

### VP Records, New York NY – Technical Business Analyst

Feb 2022 – Sep 2022

- Analyzed cost structures of royalty-payout data identifying 10% expense reduction
- Documented royalty-payout processes for 4,000+ clients ensuring compliance and reducing errors
- Automated Excel processes using VBA macros improving analysis speed by 50%

---

## EDUCATION

### CUNY Queens College, Flushing NY

Cumulative GPA: 3.83

Master of Science – *Risk Management (Actuarial Sciences)*

**Graduate Capstone:** *VaR-based CLO & ABS Portfolio Solvency Optimization* – modeled correlated default behavior across a structured credit portfolio and optimized capital allocation against tail-loss constraints

Awarded sole Samuel & Karola Waschberger Scholarship for accelerated MS students

### CUNY Queens College, Flushing NY

Bachelor of Arts – *Applied Mathematics*

Undergraduate Capstone: *Random Forest Model for Real-Estate Pricing in Queens, NY*

Dean's List Honoree

---

## SKILLS

- **Credit & Risk:** Consumer Credit Analytics, Credit Risk Modeling, Structured Credit (CLO/ABS), Portfolio Risk, Value-at-Risk (VaR), Solvency & Capital Optimization, Loss Distribution Modeling, Actuarial Methods, Scenario & Sensitivity Analysis
- **Languages:** SQL (Advanced), Python, R, Java, C++, VBA
- **Data & AI:** Statistical Modeling, Experiment Design, Data Science, Data Analytics, AI/ML, GenAI / LLM, Model Validation & Diagnostics
- **Technology:** Cloud (Azure, GCP), DevOps (CI/CD, Git, Docker), Data Platforms, Data Infrastructure, Data Governance & Lineage
- **Strategy & Consulting:** Business Analysis, Financial Modeling, Business Case & ROI Analysis, Pricing & Product Strategy, Technology Strategy, Consulting
- **Communication & Tools:** Executive Communication, Data-Backed Storytelling, Stakeholder Management, PowerPoint, Excel
